DOCUXPLORER

Hi there!

YOU'VE COME TO THE RIGHT PLACE!

DocuXplorer provides powerful Document Management Software solutions for the Healthcare Industry. Whether you are looking to improve the business operations of a large hospital, small clinic, or private practice, DocuXplorer can streamline your files, automate workflows, and offer valuable security. Refocus on patient care while your data works for you.

Let's get started with all the basics and applications specific to the healthcare industry. You'll see that investing in DMS produces a quick ROI, and promotes efficiency across all platforms and departments.

We're here to ensure that your data is safe, your team is equipped, and your organization is supported.

DOCUXPLORER

Why Document Management?

CENTRALIZE DATA

Save everything in one secure location.

FIND IT FAST

With metadata, your files are found in a snap.

AUTOMATE

Eliminate recurring (and tedious) tasks like approvals and deadline tracking.

SECURE ENCRYPTION

Control a file's accessibility and permissions while maintaining compliance with detailed audit trails.

ACCESS ANYWHERE

Your data's always available, no matter where your team is working.

SUPERIOR SUPPORT

We're here when you need us. No matter what.

Dive deeper into DMS with our <u>Document Management 101 </u>Guide

Who we are

DocuXplorer has been servicing small and mid-sized businesses for over 25 years with an intuitive and user-friendly interface that protects a company's most valuable asset—data. With all the robust capabilities and features of a large corporation's document management system, we ensure that DX is tailored to your company's unique needs.

Our highly praised support services partner with you throughout installation and offer comprehensive onboarding to your team. But our partnership doesn't end there. We're always here when you need us. We perform ongoing development behind the scenes, so your system is up-to-date, on the cutting edge, and ready for emerging trends within your industry.

"

I've had a great experience with this software. The tech support is very responsive and attentive to my requests. I would recommend this to any of my business partners.

Bret Irving,
Great Central Transport Warehouse, Inc.

How We Help Healthcare

More than any other office environment, healthcare facilities are overwhelmed with paperwork and struggle to break through information silos. They're also held to the strictest levels of document security. Implementing a DMS empowers you to reduce costs, processing times, errors, and privacy leaks, making your medical center more streamlined, productive, and secure.

COST SAVINGS

Inefficient document management is a huge expense for healthcare providers that requires physical equipment, storage facilities, services for handling, and ineffective staff time. **Digitizing physical paper documents dramatically cuts spending and can <u>return $8.55 per dollar invested</u>.**

- **Reduce materials and equipment.** Implementing a DMS allows you to divert funds from paper, printers, photocopiers, fax machines, and ink cartridges to what matters most—patient care.

- **Eliminate storage space.** Some facilities devote entire floors or off-site facilities to record keeping, leaving less space for value-adding services like medical treatment. By digitizing your records, you can store all patient files with a small footprint using on-site servers or in the cloud, eliminating costly infrastructure and maintenance.

- **Fewer staffing costs.** Minimize manual data entry of patient and billing information with automation and smart OCR processing. One employee can import and index thousands of pages a day.

- **No retrieval fees.** Each department can easily store and access their data in one repository instead of multiple drives, personal folders, or via a middleman.

Check your savings with our <u>ROI Calculator.</u>

DOCUXPLORER

SECURITY AND COMPLIANCE

In healthcare, lost documents can have catastrophic effects, from poor patient care, to incomplete insurance or legal claims. Violating stringent privacy regulations outlined by HIPAA can result in significant criminal and civil penalties. **Document Management enables you to stay compliant and in control of your records.**

Secure and backed-up. With a DMS your files are protected from physical destruction, theft, and natural disasters by keeping a backup copy of all files on separate servers.

HIPAA compliance. Document retention, role-based security, audit trails, and SSL security ensure you stay compliant with complex <u>HIPAA laws</u>.

Track every action. Keep detailed records of every action taken on a document with a complete audit trail.

Error control. Easily recover accidental deletions or incorrect user submissions.

How We Help Healthcare

DOCUXPLORER

FASTER PROCESSING AND FEWER ERRORS

Finding specific information quickly and getting it to the right people fast is vital in today's healthcare industry. Your staff needs immediate access to data to make important decisions and streamline daily processes. Hospitals and medical practices can no longer wait hours or days for records to be shared and processed. **DMS eliminates the wait.**

- **Find it fast.** Retrieving records through a digitized document management system takes a matter of seconds. Easily query all related patient records and daily notes for quick insurance claims processing, or document any and all discoverables like contracts or proposals during an acquisition due diligence process.

- **Accessible data.** Multiple departments can access the same record simultaneously without having to photocopy any files. The billing department can update payment information while healthcare employees update medical data.

- **Up-to-date information.** Versioning and Check-in/Check-out procedures prevent duplicates and ensure every record reflects the most recent and accurate information, resulting in fewer errors and redundancies.

- **Automate recurring processes.** Automate and track daily tasks like locating and processing outstanding bills so you can spend valuable time caring for patients.

DOCUXPLORER

CONNECTIVITY AND ACCESSIBILITY

Data comes and goes from many places: emails, faxs, in-house software and web applications. **DocuXplorer can interact seamlessly with your tech stack so your staff has access to what they need, wherever they are, instantly.**

- **Remote web access.** Whether at their desk or in the field, your team can access the files they need on any device.

- **Secure electronic signatures.** We integrate with eSignature technology to enable legally binding agreements that are quickly retrievable.

- **Streamline communication.** Keep all departments connected including Admissions, Charting, Registration, Payroll, Pharmacy, Human Resources, Accounting, Purchasing, Legal, Marketing, Sourcing, and IT, whether they're in the same office or around the globe.

- **Seamless integrations.** Consolidate your Electronic Medical Records (EMR), Practice Management (PM) systems, medical devices, lab results, and transcriptions in one place with quick find capabilities and total safety and control.

DOCUXPLORER

QUICK IMPLEMENTATION AND TEAM ONBOARDING

Converting your paper records into a digital platform may seem like a daunting task, but we're here to make it easy and keep it cost-effective. **DocuXplorer has helped countless healthcare providers achieve their BPM goals with seamless onboarding and personalized support.**

Hands-on training. DX's organizational experts have years of taxonomy training and will help you determine and build a system that fits your unique needs.

Quick onboarding. DX's interface is intuitive and easy to use. Your staff needs no technical expertise to operate on a day-to-day basis.

Prebuilt and custom templates. DX comes with a collection of prebuilt templates designed for the healthcare industry and the related departments. Start here for inspiration or build out completely custom processes.

Scalable implementation. Start with a small batch of records, and use the subsequent savings to help finance the next stage. Or do a total buildout all at once. DX is flexible to fit your budget and goals.

How We Help Healthcare
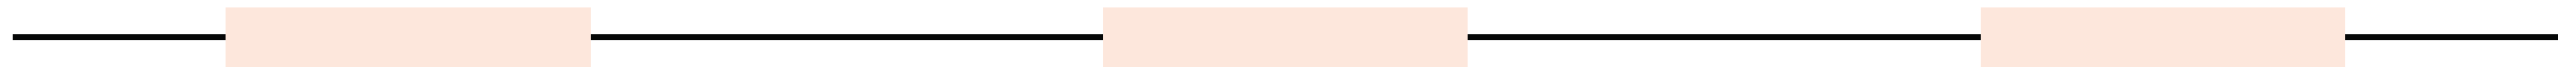

DOCUXPLORER

HAPPIER AND HEALTHIER PATIENTS

> *The healthcare system is being driven more strongly than ever to deliver better, safer, more satisfying care at a lower cost. That, coupled with new electronic tools, payment arrangements, and capabilities, will drive levels of innovation beyond what we have seen before.*

- Robert Wachter, University of California, San Francisco
HFMA Report: Health Care 2020, Transformative Innovation

Meeting consumers' needs and expectations is key to keeping them in a health system. Reducing costs, processing times, errors, and privacy leaks makes your medical center more streamlined, productive and secure. The less time and money spent on administrative paper processing the more resources your staff can devote to providing the best possible care for your patients during a time of consumer oriented care. **When it comes to patient care—results matter most. Put your data to work so you can exceed high expectations.**
